ScanMate
i920 Scanner

The information organizer that
won't take up your whole desk.
Or your whole day.

Know what it feels like to get ahead.

The compact **Kodak ScanMate** i920 Scanner saves desk space with its small footprint, and saves time by automating repetitive tasks. Plus, it creates crisp, clear images and easily readable text on the first scan. So you can make quick work of your scanning tasks. And get back to business.

With Kodak's Smart Touch functionality, the **ScanMate** i920 gets important business documents into your information network in an instant. That's because Smart Touch automates multiple-step scanning operations by capturing, processing, and sending information for you. At the touch of a button, Smart Touch helps you make e-mail attachments, picture files, searchable PDFs, and more. Plus it files documents or sends them to "the cloud." For example, if a business configured its ID card scanning process as Option 2, an employee could simply select "2" on the scanner display. The ID card would be scanned, processed, and its image sent to the proper destination — automatically.

The **Kodak ScanMate** i920 Scanner. The small, but powerful, way to clear off your desk and get ahead of your day.
